PRICE LIST WITH EFFECT FROM 14/ 05/ 2018.

MEMORANDUM

To : Head of Procurement
From : H.D. /CPD
Subject : Printing ink for sheet fed machines
Date : 09.07.2018

We use 02 nos of Heidelberg two colour machines, 01 KORD machine and 01 four colour machine (Heidelberg SM-74) in the printing department.

All above printing machines are sheet fed machines (Sheets are fed to the machine for printing where as the web is fed to the web printing machines for newspaper printing).

In the case of high quality printing such as printing on art paper, the four colour machine is being used. In general, we don't print art papers on existing two colour machines as these machines are very old, so that the required print quality on art papers cannot be achieved.

After testing of different brands of inks since the inception of SM-74 machine in 2012, the ink supplied by JDC Printing Technologies (Pvt) Ltd (Brand- Aranon T) has been selected and being used for last few years.

While the printing of "Business.LK" magazine, where the print quality was utmost important, the brand "Jet Speed" (high quality and expensive) was used with the approval of then management.

When the high quality is demanded (By external customers), still we use 'Jet Speed' ink adding the extra cost for the ink to the estimate.

In the case of the printing on two colour machines by which normal white printing paper is printed, the Brand Excel G (supplier DIC Lanka Pvt Ltd) is being used as the quality is acceptable and the lowest offered price as well.

This is for your information.
